

# eurolite® THE ORIGINAL

KLS LED compact light set

## KLS-190

### Classic looks, powerful light

A KLS with COB LEDs that convinces with its classic appearance and its powerful and homogeneous light: With the KLS-190, Eurolite now offers exactly such a spotlight bar.

### Equipment

4 spots with 30 watts each and RGB color mixing are used. The wide beam angle can be limited from 42° to narrow 9° by using a lens included in delivery. The mounting of the lens is very simple and can be done in seconds. In addition, 4 cold white LEDs are installed in the bar, which can be used for stroboscope effects.

### Control and stand-alone programs

The compact light set is controlled via DMX. For operation via wireless DMX, the KLS-190 offers a USB socket into which a Quick DMX receiver can be plugged. But even without external control, 19 well thought-out stand-alone and audio programs each provide a variety of effects. The strobe LEDs can be switched on if desired in addition to the programs.

### Flexible setup

The special mounting system of the KLS-190 not only allows the bar to be mounted on a stand, it also allows the stand rod to be pushed through to attach a spotlight or loudspeaker box on top. Up to 4 additional spotlights or effects can also be mounted on the KLS-190 itself. The power supply for these devices can be provided via the cold device output of the bar. A transport bag is included.
